

2016 Score Card

In an effort to help craft beer consumers make informed decisions, Protect Michigan Craft Beer surveyed the candidates for house seats this year. The following 37 campaigns responded and based on their responses we scored them from zero to four pints on their support for the Craft Brewing Industry. We believe that informed voting is the foundation of the power of the people to appoint legislators to protect the interests of citizens. We encourage civil discussions of the policies and actions of our political process over pints of craft beer brewed and sold in the state of Michigan.
